**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 6-12 and 15, drawn to a nucleic acid molecule.

Group II, claim(s) 3-5, drawn to a polypeptide.

Group III, claim(s) 13, drawn to a first method of using the nucleic acid molecule.

Group IV, claim(s) 14, drawn to a second method of using the nucleic acid molecule.

Group V, claim(s) 16-19 and 21-22, drawn to a third method of using the nucleic acid molecule (sense expression).

Group VI, claim(s) 16 and 19-22, drawn to a fourth method of using the nucleic acid molecule (antisense).

Group VII, claim(s) 23, drawn to a fifth method of using the nucleic acid molecule.

Group VIII, claim(s) 24, drawn to a first method of using the polypeptide.

Group IX, claim(s) 25, drawn to a second method of using the polypeptide.

In addition to electing one group above, Applicant is further required to elect one of the following sequences:

- (a) SEQ ID NO:3 encoding SEQ ID NO:4
- (b) SEQ ID NO:5 encoding SEQ ID NO:6
- (c) SEQ ID NO:8
- (d) SEQ ID NO:9
- (e) SEQ ID NO:10

It should be noted that the elected sequence must correspond to the elected group.

2. The inventions listed as Groups I-IX and (a)-(e) do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: cis-prenyltransferases are known in the prior art (specification, pp. 2-3). The sequences identified by SEQ ID Nos. are structurally, biologically and chemically distinct from each other. They also require separate database searches. The nucleic acid molecule is structurally, biologically, chemically and functionally distinct from the polypeptide. Furthermore, the methods of using the nucleic acid molecule have different steps, use different reagents and have different outcomes. Likewise, the methods of using the polypeptide have different steps, use different reagents and have different outcomes. Accordingly, the claimed invention lacks unity.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of

record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong T. Bui whose telephone number is 571-272-0793.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anne Marie Grunberg can be reached on 571-272-0975. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
